

SPORT IN THE BOX - WATERPOLO

Production and playout system for sports

Sport In The Box is a powerful production and playout system for sport that lets the user create engaging live content and output it to videoboard, in-house tv systems and streaming.

It handles playout of stored images and videos, live video inputs, replays and graphics. With great flexibility Sport In The Box can output almost any format and resolution to adapt with custom video screens, making it the ideal solution for both smaller clubs and larger arenas.

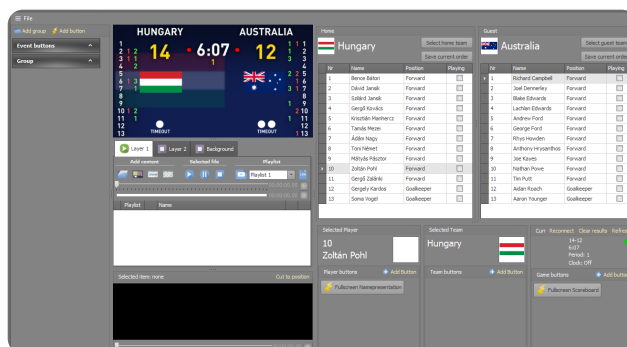

Sport In The Box can have multiple live video inputs with SDI, HDMI or NDI and the output windows can be placed in any size and position on the desktop to adapt to the LED-screens used, removing the need for a video scaler.

Waterpolo Interface

Sport In The Box has a team interface for waterpolo where teams are managed and saved. Each team with team name, logo and player lineup with names, numbers, pictures and positions can be entered. This, together with the live data from a connected Calypso controller can then be used to display scoreboard, player presentations, team lineup, penalties at the click of a single button.

TOP FEATURES

- Connects directly to Calypso waterpolo controller
- Scoreboard graphics with customizable colors
- Team interface with teamlogos and player pictures
- Output windows in any size and position on desktop removes the need for a scaler

Graphics

Sport In The Box for Waterpolo comes with full screen scoreboard style graphics where you can customize colors and background. Custom graphics pack can be implemented upon request.

Sport In The Box can have multiple screen controllers that render different content at the same time. This can be used to control multiple screens or to show scoreboard on part of the videoboard and sponsors or video on the other part. With the help of quickbuttons the user can quickly show animations and commercials synchronized in both screen controllers.
